# ARMOUR Portfolio & Hedge Update

As described in our September 17, 2014 Monthly Company Update, ARMOUR sold approximately \$3 billion of 15yr MBS securities in the first ten days of September. These transactions will settle in November and December 2014. Therefore, these assets have been removed from the portfolio in this presentation. However, since these transactions were done on a forward settle basis and the bonds will remain on repo until they settle, they are still included in all the repo reporting herein. The swaptions previously detailed in our Monthly Company Updates have expired.

The results of these sales upon settlement will effectively:

- Lower our net balance sheet duration to -0.31.
- Lower our estimated year end leverage ratio to approximately 6.4 x vs Q2 2014 shareholder's equity.
- Change our hedge ratio against assets to 81.3%.
- Change our hedge ratio against repo to 88.9%.

# ARMOUR Portfolio Constant Prepayment Rates (“CPR”)

ARMOUR expenses premium amortization monthly as it occurs.

Constant Prepayment Rate (“CPR”) is the annualized equivalent of single monthly mortality (“SMM”). CPR attempts to predict the percentage of principal that will prepay over the next twelve months based on historical principal pay downs.

CPR is reported on the 4th business day of the month for the previous month's prepayment activity.
